Install the PC Gaming Receiver software on a computer

1. Before you connect the PC Gaming Receiver to the computer, insert the installation disc in the disc drive on the computer
2. Follow the steps in the wizard to install the software
3. Remove the green label from the USB connector on the PC Wireless Gaming Receiver

4. Insert the USB connector into an available powered USB 2.0 port on the computer

Note: The USB ports on the front of your computer are probably not powered USB 2.0 ports, Try using the ports on the back of your computer

5. When your USB connector inserted a dialog Pop up with the “Welcome to Found New Hardware Wizard” ,Then need select option “Install from a list or specific location(Advanced)”,click on button“Next”

6. Make sure the “Search for best driver in these locations” is selected and unselect “Search removable media”,Also select “Include this location in the search” ,Browse to “USB Driver” in CD folder,click on button “Next”

7. The “Completing the Found New Hardware Wizard” screen will appear and click on button “Finish”

Connect an Xbox 360 wireless accessory to the PC wireless Gaming Receiver

1. Turn on the Xbox 360 wireless accessory that you want to use with your receiver
2. Press and hold the connect button on the PC Wireless Gaming Receiver, The light flashes green
3. Press the connect button on the Xbox 360 wireless accessory, A green flashing light on the accessory and the receiver indicate that the device is trying to establish a connection, For example, if you are connecting the Xbox 360 wireless Controller, the Ring of Light will rotate as the device tries to connect

4. After the connection process is complete, the green light on the receiver and the accessory will stop flashing and remain illuminated, If you are connecting the Xbox 360 Wireless Controller, the light indicates the quadrant to which the accessory is connected

You cannot connect an Xbox 360 wireless accessory your Windows PC by using the PC Gaming Receiver, Try follow steps to resolve the problem

1. Verify that the accessory is an officially licensed Xbox 360 wireless accessory
2. Examine or replace the batteries to make sure that could interfere with the Xbox 360 wireless accessory
3. Move the receiver away from other devices that could interfere with the wireless communication between the receiver and the Xbox 360 wireless accessory
Note: Devices such as wireless routers, cordless telephones, and microwave ovens can generate wireless accessory
4. If the light on the receiver is not illuminated, examine the USB connection between the receiver and your computer, Make sure that the receiver is connected
