

HDE Shock Proof Case Instructions

Step 1: Gently removed the black frame from the rubberized body of the case and discard the black mold piece.

Step 2: Be sure to locate the home button and speaker with the proper cut outs. Insert your tablet into the rubberized body of the case. It is easiest to start sliding in the side of the tablet towards the handle.

Step 3: Firmly press your tablet into the body of the case. You will need to fix some of the edges to make sure the rubber sides are wrapped over the front of the screen protector unit. this will ensure your tablet stays secure in its protective cover.

Step 4: Congratulations! you may now enjoy your tablet with the confidence that it is safe and protected.
